Portfolio Overview

Healthcare

Medical AI Assistant & Digital Doctor

Banking & Finance

OCR Platform & Digital Wallet

AI Solutions Portfolio

Retail & E-commerce

Conversational AI & Analytics

Education & Training

AR/VR Medical Learning Suite

HEALTHCARE AI

Medical AI Assistant & Digital Doctor

Medical Image Reader

CNN + GPT-4V for CT/MRI/X-ray analysis with risk stratification

Prescription OCR

Vision transformer for Bangla+English handwriting recognition

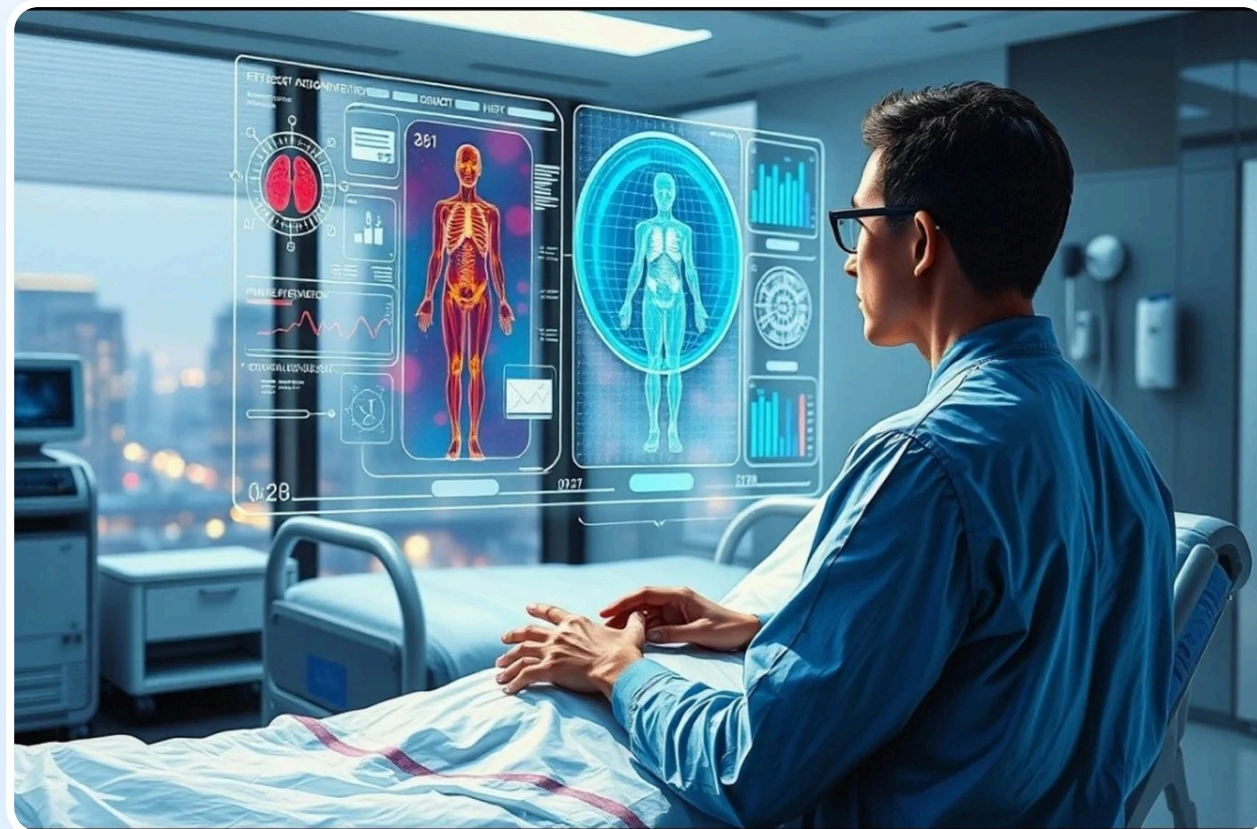

Symptom Analysis

Medical triage, differential diagnosis & pre-screening support

Digital Doctor

24/7 GP-level triage with doctor-in-loop validation

35%

RADIOLOGIST WORKLOAD REDUCTION

95.6%

OCR ACCURACY

40%

EARLY DETECTION IMPROVEMENT

DIGITAL TRANSFORMATION

DiagnosticCentre AI

Online Appointment Booking

Real-time slot availability, WhatsApp/SMS confirmations, bookings under 3 minutes

Report Management

QR-code enabled upload/download, LIS integration, paperless handling

AI Chatbot (MedBot)

Symptom checker, FAQ handling, intelligent triage, escalation to staff

Admin Panel with HITL

Doctor scheduling, patient oversight, AI output approval workflow

Key Impact Metrics

Staff Workload Reduction

60 %

Portal Adoption Rate

>50 %

Booking Time Reduction

<3 min

CONVERSATIONAL AI

Multi-Modal Platform

Voice Biometrics

99.1% accuracy, 3s authentication, secure user verification

Multi-Language Support

Bangla, English, Banglish + 40+ language translation

Sentiment Analysis

Predicts escalation 90s early with 72% accuracy

Negotiation Engine

Reinforcement learning for discounts and upgrades

Whisper Agent

Real-time knowledge surfacing & automated summarization

Customer Care & Platform Guides

E-Commerce Assistant

Product search, personalized recommendations, order tracking, smart negotiations

Virtual Tour Guide

Interactive museum/experience navigation, contextual information, multi-language support

LMS Platform Guide

Course recommendations, learning path optimization, instructor Q&A, progress tracking

Banking Assistant

Balance inquiries, fund transfers, fraud alerts, financial advice 24/7

Virtual Doctor (GP)

Symptom triage, health advice, appointment scheduling, prescription guidance

Instructor Support

Automated grading, student performance analysis, content recommendations

DOCUMENT PROCESSING

Banking OCR/ICR Platform

⚙️ Technical Architecture

Vision Transformer

Confidence-Based HITL

Immutable Audit Log

Tesseract Fallback

⚡ Key Benefits

95%+ English Accuracy

85%+ Bangla Accuracy

70-80% Faster Processing

Account-Opening & KYC

Auto-pass & maker-checker workflow with confidence scoring

95%+

ENGLISH ACCURACY

Cheque Processing

Handwriting recognition & fraud detection with AI analysis

85%+

BANGLA ACCURACY

Loan Applications

Multi-page PDF splitting & structured data extraction

70-80%

FASTER PROCESSING

Regulatory Reporting

Immutable audit log & compliance dashboards

100%

AUDIT READY

FINANCIAL PLATFORM

Digital Wallet & Payments

 Identity & Access

 Wallet Management

 Payments & Transactions

 Ledger & Accounting

 KYC/KYB Onboarding

 Compliance & Sanctions

 Support & Admin

 Blockchain & dApps

★ Core Capabilities

MFS Platform

Digital Banking

Payment Gateway

Merchant Payouts

Compliance Fintech

Blockchain Enablement

 **Blockchain-Backed Wallet** Tokenized balance representation & on-chain recording

 **Stablecoin-Based Payments** Remittance, cross-border settlement, merchant payments

 **Smart Contract Automation** Programmable treasury workflows & payment automation

 **Hybrid Fiat-Crypto Wallet** Seamless fiat-to-crypto and crypto-to-fiat transactions

 **Blockchain Identity Verification** Decentralized credentials & external network integrations

TECHNICAL ARCHITECTURE

Layered System Design

01 Client Access Layer

Mobile Apps

Web Apps

CROSS-PROJECT ANALYSIS

Comparative Insights

Identifying common patterns and synergies across the AI portfolio enables strategic reuse and accelerates time-to-value for new initiatives.

Common Patterns

Multimodal Interfaces

Text, voice, images, scanned documents

Human-in-the-Loop

Expert validation for safety & compliance

Multilingual Support

Bangla, English, Banglish, 40+ languages

Modular Microservices

RESTful APIs & reusable components

Data Governance

End-to-end MLOps pipelines

Cross-Vertical Reuse

Shared OCR & biometrics modules

Key Synergies

- ✓ **OCR Engine Reuse:** Healthcare prescription engine repurposed for bank forms
- ✓ **Voice Biometrics:** Banking authentication securing patient portals & e-pharmacy
- ✓ **Doctor + Pharmacist:** AI doctor calls pharmacist module for prescription analysis
- ✓ **Unified Data Layer:** Structured data feeds analytics across verticals

FUTURE SCOPE

Blockchain Enablement

Blockchain-Backed Wallet

Tokenized balance representation & on-chain recording

Stablecoin-Based Payments

Remittance, cross-border settlement, merchant payments

Smart Contract Automation

Programmable treasury workflows & payment automation

Hybrid Fiat-Crypto Wallet

Seamless fiat-to-crypto and crypto-to-fiat transactions

Blockchain Identity Verification

Decentralized credentials & external network integrations

STRATEGIC CONCLUSION

Portfolio Strengths

Our AI-powered solutions demonstrate proven business impact across healthcare and financial sectors with quantifiable outcomes and scalable architecture.

Modular architectures designed for cross-vertical expansion

Human oversight ensuring trust and regulatory compliance

Quantifiable business impact with measurable ROI

Future-ready platform for AI-first transformation

AI INNOVATIONS

Strategic Value

Configurable Platform Core

MFS, digital banking, payment gateway, merchant payouts

Blockchain-Enabled Future

Hybrid Web2-Web3 wallet with crypto settlement

Next Steps

1

Client-specific customization & branding

2

Continued R&D on blockchain integration

3

Expanded multilingual support beyond Bangla & English

4

Wearables & IoT device integration

5

Agentic AI for proactive recommendations
