

Request for Proposal – AI Tool for Real Estate Companies (Project Eugenia)

1. Introduction

This request for proposal concerns the development of an AI-based decision support tool for real estate companies within the framework of Project Eugenia. The objective is to create a system-agnostic, learning, and cost-effective tool that analyzes large data volumes and provides prioritized action recommendations.

2. Scope

The assignment includes development of data ingestion, AI analysis, recommendation engine, dashboards, and integrations with systems such as Greenview, Fast2, Vitec, Microsoft CRM, WebPort/Kiona, Curves/Ecoguard, and AktivBo, among others.

3. Deliverables

- Requirements specification
- System architecture
- Data and integration model
- Proof of Concept
- Pilot installation
- Dashboard package
- Documentation and training materials
- Support and maintenance plan

4. Consultant Requirements

The supplier must demonstrate documented experience in:

- AI/ML development within the real estate sector
- Integration with property management and energy systems
- Data engineering and BI
- Project management and change management

5. Timeline

Expected implementation period: 12–16 weeks, including POC and pilot.

6. Commercial Terms

The proposal shall include:

- Fixed price for POC
- T&M or fixed price for pilot phase
- Licensing and operational costs
- SLA for support and maintenance

7. Proposal Format

The proposal shall include:

- Company presentation
- Resource profile(s)
- Technical solution description
- Project plan and milestones
- Risk management approach
- Total price and pricing appendix

8. Deadline and Contact

Proposal submission deadline: 2025-02-11
